

Download the sims mobile cheat

Continue

Can you use cheat codes on sims mobile. How to do cheats in sims mobile. Download cheat game the sims mobile.

Electronic Arts Have you ever wondered how YouTube Simmers get their custom content—commonly referred to as “CC”—in their Sims 4 game? Electronic Arts never released an official tutorial on downloading CC in The Sims 4, and there are a lot of YouTube tutorials, but they can be vague. Custom content, or “Mods,” is additional assets and behaviors created by other players for the purpose of enriching the game beyond the base game that Maxis has published. This content often includes clothes for your Sims, traits, aspirations, and much more. Custom content is created and tested by users—it’s a big part of the Sims community. In fact, Maxis encourages and supports the modding community! You can read more about that on The Sims 4 Mods and Game Updates FAQ page. So, here’s a detailed tutorial on how to activate and download mods in The Sims 4 on Windows 10. Set Up Custom Content Locate and Open Your Resource.cfg File After launching The Sims 4 and enabling mods in your game, locate the Mods folder for The Sims 4. The default path for your Sims 4 folder is located in your Documents folder. The Mods folder will generate inside the Sims 4 folder once you have launched the game with mods enabled. In the Mods folder, there is a “Resource.cfg” file. Right-click to open it using a simple text editing program, such as Notepad. You should see something like this, but on one line: Priority 500 PackedFile *.package PackedFile */*.package PackedFile */*/*.package PackedFile */*/*/*.package PackedFile */*/*/*/*.package PackedFile */*/*/*/*.package This shows how many folders deep the system will check for mods/CC. The number of asterisks equals the number of folders deep. There should be six by default, as shown here. If you’d like to add more, just follow the same pattern. Create New Folders in the Mods Folder This mostly goes for people who don’t have folders within the Mods folder yet or have made folders, but there’s nothing in them. If you have a couple of folders with stuff in them already but a bunch of things that aren’t, go ahead and follow along. Create folders labeled “Build/Buy” and “CAS.” By creating folders to start with, you’ll be more prepared to keep your files organized later. Enable Mods in Your Game After launching the Sims 4 game, you’ll see a three-dot icon in the top-right corner of the main menu. When you click this, you’ll get the settings menu. Click the “Other” tab and then select the “Enable Custom Content and Mods” option. That was the easy part. Go ahead and enable “Script Mods Allowed,” too. When the boxes are ticked green, that means the mods have been enabled. Check That the Mods Folder Is Now in Your EA Folder When you downloaded your game, you chose a folder to install The Sims 4 to. Navigate to it and locate the Mods folder. You can usually find this in Documents > Electronic Arts > The Sims 4 > Mods, but you might have installed it in another location. We recommend using File Explorer’s built-in search box to help you locate the folder. Choose a Mod and Download When clicking around and downloading mods, it’s very important to read the fine print. You’ll come across a huge selection of CC that’s compatible with the base game (no packs required), however, plenty of available mods will require a pack for one reason or another (like a re-texture of a base game item). For the sake of this tutorial, I chose a few base game compatible mods that are linked below. You’ll see that all of these mod pages say “base game compatible” in the description: Note: The “Female Autumn Collection” has separate files, so you can pick and choose what you want to download. Packages will sometimes come separately, but not always. Sometimes a set will be available only as a merged pack of content. Here’s a quick list of my favorite and trusted CC sites: Move the Files to Your Mods Folder Locate the downloaded files on your computer and then move the files manually to The Sims 4 Mods folder. In the Mods folder, create a Mods Tutorial (any name will suffice) subfolder and move all of the “.package” files from the downloads folder into the Mods Tutorial folder. CC that appears in the “Create a Household” screen (clothes, hair, accessories, etc.) will be stored in the “CAS” folder, Build/Buy CC should go in the “Build Buy Mods” folder, and so on. Keeping your folders organized can help you single out corrupted files that cause issues in your game. Also, by putting newly downloaded mods in a separate folder, you can launch the game and decide whether or not you like the new mods you’ve downloaded. We suggest you store newly downloaded CC in a folder labeled “new mods” for organizational purposes. If you launch the game and decide you don’t like what you’ve downloaded, it’s easy to navigate to the new folder and figure out which file to delete. The screenshot above includes the file names of the downloaded content linked earlier in this post for this how-to guide. Launch Your Game! Once you’re in the “Create a Household” screen, click over to the “Hair” section. If you’re having trouble finding the custom content you’ve downloaded, click the small arrow next to “Feminine,” click content, and check the box next to “Custom Content” so that the hair section shows only custom content you’ve downloaded. You can enable this filter on all screens, even in Build/Buy! What Is a Mod versus a Script Mod? Now that you’ve dabbled a little bit in custom content for The Sims 4, you must be wondering why we turned on script mods. Script mods are coding mods that can alter game behaviors, as opposed to pre-existing Maxis coding. One popular script mod is The Sims 4 MC Command Center Mod created by the user, Deaderpool. The MC Command Center Mod has an abundance of options in the form of multiple modules that tackle different functionalities: adjusting household bills, making selected sims immortal, pregnancies, and even creating story progression-style mechanics. Pretty much anything you can think of, this mod can do it, and it’s updated on an on-going basis. We’ve already gone over how to turn on script mods, but where do you place the MC Command Center mod in the Mods folder? First, make sure the modules and packages are placed into the same folder and that the folder is no more than one level deep in The Sims 4 mod folder structure. For example, The Sims 4\Mods\MCCC is okay, but The Sims 4\Mods\Script Mods\MCCC is not. The Sims 4 client will only go one-level deep when looking for script mods. In the screenshot above, you’ll see that the “McCmdCenter” file is in the very first level of the Mods folder. If you don’t do this correctly, script mods will not appear in your game. Save and Back Up Your Sims 4 Folder As a general rule, always back up your Sims 4 folder to a USB drive or external drive in case of disaster. Right-click your file and then select “Copy” (Ctrl + C on your keyboard), navigate to the safe location you’ve made, and then right-click and select “Paste” (Ctrl + V on your keyboard) into the new location. This ensures you have an updated copy of your game (Sims families and your mods) should you have to reinstall the game. It takes time to build up a collection, and it’s a nuisance to lose progress just like losing any saved data for any other video game. And that about covers it! Remember, you should always contact the owner of the mod to report bugs or if you have any questions. The Sims series celebrates the banalities of everyday existence. However, unlike real life, The Sims 2 has cheat codes that give you free money, free clothes, and free food. There’s even a way to avoid paying bills altogether. Before you can use most other cheats, you must activate the Cheat Gnome by pressing L, R, Up, A, Z during gameplay. After activating additional cheats, you can take advantage of them by talking to the Cheat Gnome. Input these codes at any time during gameplay with the GameCue controller: Effect Cheat Code Get 9,999 Simoleons R, L, Z, Right, Left Full motives Up, X, Up, Right, Z Unlock all lots X, Z, Left, X, Up, X Advance time by six hours X, B, L, Up, Down Set Skill level Y, X, B, Z, Left Unlock all objects Z, X, Down, Left, Up Unlock all recipes Z, B, Up, Down, Right, A Unlock all fashions B, Z, Down, Right, B Horn sound R, L, R, L, Y Press Right, Down, Right, Down, Right at the title screen to see a picture of the development team. Combine the following ingredients for various bonuses. Effect Ingredients Aphrodisiac boost Ostrich and Passion Fruit Aphrodisiac boost Carrots, Lime, Pork, and Passion Fruit Energy boost Dangleberry, Yogurt, Strawberries, and Cherries Energy boost Ostrich, Eel, Strawberries, and Mangosteen Skills boost Chicken, Onions, Eggs, and Milk Adding llama to any meal will make your Sims sick, so avoid using it as an ingredient. If you’re in danger of getting fired and you miss your ride to work, switch to another job, then change back to your original job to avoid being reprimanded. Invite people to get in your hot tub, then place objects around it so that they can’t leave. They’ll eventually become your friends. The best way to keep friends is by throwing daily parties. Make everyone in your household get a job. Right before they are about to come home, use the cheat that advances time to throw off their schedules. You can exploit this trick to avoid running into your roommates indefinitely. If you have bills that you don’t want to pay: Build a 4x4 room with a fireplace, a trash bin, and a door. Gather all of your bills, then go into the room. Wait until you catch fire and burn to death along with your bills. Return to life by paying the Grim Reaper or challenging him to a fiddle contest. You won’t have to pay the burnt bills. There’s a special potion you can concoct to make your Sims always accept Love Socials: Purchase an aquarium, a Garden Hutch food tree, a blender, a food processor, an oven, and a refrigerator. Harvest the food after two or three days. Take the following ingredients from the refrigerator: AvocadoStarfruitPersimmonChupa-Chupa Put everything in the food processor and select Prep. Cook the dish in the oven. Put the dish in the blender and select Make Smoothie. Give the smoothie to the Sim you want to fall in love.
